David Bradley  
President  
Ontario Trucking Association  
555 Dixon Road,  
Toronto, ON M9W 1H8

David,

On behalf of Fleet Challenge Ontario, I'm offering our support to the Ontario Trucking Association's speed limiting proposal.

Fleet Challenge Ontario is part of Fleet Challenge Canada, a program dedicated to promoting and supporting continuous improvement in energy efficiency and emission reduction among on-road fleets of all kinds.

The transportation sector is the second largest contributor to greenhouse gases and other particulate emissions contributing to climate change and smog, in Ontario. The Ontario Trucking Association's speed limiting proposal is an important step toward clean air by reducing emissions.

We agree that although many Ontario Trucking Association members already govern the road speed of their fleet, there are good environmental, health, safety and economic reasons for an industry-wide approach.

We applaud the Ontario Trucking Association for being a leader in greening fleets.

Best regards,
